HCSP Presales Access v1.0

1. Huawei MA5800 supports ISSU. By separating control and forwarding, services are not interrupted during upgrades and ONUs do not go offline.

A. False

B. True

Answer(s): B

---

2. In the scenario of upgrading China Broadcasting and Television's GPON to XGPON, considering compatibility with the existing network, XGCOMBO boards are usually used. What are the advantages of this solution? (Multiple Choice)

A. Support the access of XGPON ONU to achieve bandwidth upgrade

B. Existing ODN does not need to be modified

C. Compatible with EPON ONU smooth access

D. Compatible with GPON ONU smooth access

Answer(s): A,B,D

---

3. What OLT products does Media FTTH sell? (Multiple Choice)

A. MA5800-GP16

B. MA5800-X7

C. MA5800-X15

D. MA5800-X2

Answer(s): B,C,D

---

4. Huawei's MA5800 series equipment is a centralized OLT, leading the industry.

A. False

B. True

Answer(s): A

---

5. Jiangsu Cable's existing network is mainly EPON, which can be smoothly upgraded to XGPON through the multiplexing solution.

A. False

B. True

Answer(s): A

---

6. Optical products continue to develop in the GPON standard, and the current mainstream construction is shifting from GPON to 10GPON. At the same time, the industry is also actively defining the relevant standards and capabilities of the next generation 50GPON.

A. False

B. True

Answer(s): B

---

7. Huawei Financial Data Center Transmission Solution FC Interface maximum supports:

A. FC2400

B. FC4000

C. FC1600

D. FC3200

Answer(s): D

---

8. Which of the following is the correct description of the SmartAXEA5800WiFi tuning license activation management method?

A. Can only be activated and managed on NCE-FAN

B. Can be activated and managed in eSight and stand-alone

C. Management can only be activated in eSight

D. Can be activated and managed on NCE-FAN and stand-alone

Answer(s): C

---

9. GPON and 10GPON support the same ODN because their upstream and downstream wavelengths are independent, and their performance does not affect each other? (Multiple choice)

A. When GPON and 10GPON share the ODN network, the performance can reach the maximum

B. GPON and 10GPON support shared ODN because their upstream and downstream wavelengths are independent, and their performance does not affect each other.

C. GPON and 10GPON can share the combo optical module and use it on the same Combo PON port

D. There is overlap between the wavelength ranges of GPON and 10GPON

Answer(s): A,B,C

10. Huawei access product network management supports rogue ONU detection function.

A. False

B. True

Answer(s): B

11. The anti-DoS attack feature provided by OLT mainly protects the system CPU (Central Processing Unit) resources from which two aspects? (Multiple choice)

A. Anti-DoS attack message processing strategy

B. Anti-DoS attack whitelist

C. Anti-DoS attack blacklist

D. Anti-DoS ACL filtering

Answer(s): A,B

12. In the 14th Five-Year Plan for Radio and Television, which investment areas will be focused on? (Multiple choice)

A. Smart Supervision

B. Converged Media Cloud

C. Customer acquisition business

D. Cable TV network upgrade

Answer(s): A,B,C,D

13. Which of the following are types of ACL classifications? (Multiple Choice)

A. Physical layer ACL: Rules can be formulated based on link layer information such as source MAC address, VLANID, Layer 2 protocol type, destination HAC address, etc., to process data accordingly.

B. Basic ACL can only formulate rules based on the third-layer destination IP and perform corresponding analysis and processing on the data packets

C. Advanced ACL can formulate rules based on the source IP address information of the data packet, the IP address information of the user, the protocol type carried by IP, and the characteristics of the protocol (such as the source port and destination port of ICP, and the type of ICIP message).

D. User-defined ACL: You can flexibly define matching message rules

Answer(s): C,D

---

14. In FTTM security network, which ONUs support POE power supply?

A. OP603E-L1

B. OP803E-E

C. OP613E-E

D. OP871E

Answer(s): C

---

15. What panel ONUs does Huawei support for the "86" box on the office desk? (Multiple choice)

A. P871E

B. P67OE-H

C. Port P812E

D. P603E-E

Answer(s): A,B

16. Under the ADM configuration in the STM-16 level two-fiber bidirectional multiplex section shared protection ring, the service protection situation is:

A. The two circuit boards have nothing to do with each other

B. Two circuit boards back up each other

C. Two circuit boards, one master and one backup

D. Half of the capacity of one board is used to protect half of the capacity of the other board

Answer(s): D

17. The ONU with T-front is an industrial style.

A. False

B. True

Answer(s): B

18. The 802 1x authenticated port can be either a physical port or a logical port.

A. False

B. True

Answer(s): B

19. Which of the following refers to product life cycle status? (Multiple choice)

A. Prohibition of Sales

B. Normal sales GA

C. Stop selling EOM

D. Controlled Sales

Answer(s): A,B,C,D

---

20. What is Huawei's highway transmission solution mainly promoted?

A. Trunk ASON + road section soft and hard pipe

B. Trunk ASON + road section hard pipe

C. Trunk ASON + road section soft pipe

Answer(s): A
