Huawei Certified Solutions Expert

1. HUAWEI CLOUD What are the visual APIs in the EI artificial intelligence API.

☐ A. Image recognition

☐ B. Face recognition

☐ C. Content review

☐ D. Image search

Answer(s): A B C D

---

2. Regarding the impact of cloud drive deletion on cloud drive backup, which of the following statements is correct?

☐ A. After deleting cloud drive, you can also use backup to create cloud drive

☐ B. After deleting the cloud hard disk, you can also use the backup to restore the cloud hard disk

☐ C. After deleting the cloud hard disk, the backup data will not be deleted

☐ D. After deleting the cloud hard disk, the backup data is also deleted

Answer(s): A B C

---

3. Virtual private cloud(Virtual Private Cloud, VPC for short) is an isolated and private virtual network environment that users apply for on Huawei Cloud.

A. TRUE

B. FALSE

Answer(s): A

---

4. How does an elastic cloud server build a logically completely isolated network area?

A. Virtual private cloud

B. Cloud audit

C. Cloud container engine

D. Elastic scaling

Answer(s): A

---

5. After deleting the elastic scaling group, the elastic cloud server instance automatically created by elastic scaling will also be deleted automatically.

A. TRUE

B. FALSE

Answer(s): A

---

6. There is no limit to the size of the exported image.

A. TRUE

B. FALSE

Answer(s): B

---

7. What operation cannot be performed on data disk mirroring?

A. Apply for a data disk

B. Copy the mirror

C. Apply for the server

D. Export the mirror

Answer(s): C

---

8. Regarding the description of purchasing a physical dedicated line, which of the following is wrong?

A. The physical dedicated line supports partner purchase and self-service purchase

B. If you want to create a managed dedicated line, you can only choose the partner purchase method

C. Before purchasing a dedicated line for self-service, it is recommended that you consult with the operator about the access plan and pricing plan

D. Self-service purchase method After purchasing the physical dedicated line, there is no need to contact the operator for construction, and access to equipment in the computer room

Answer(s): D

---

9. Which of the following may cause the file system mounting failure?

☐ A. The file system capacity is too large

☐ B. File system has been deleted

☐ C. Used to access the file system DNS error

☐ D. The shared path in the mount command is entered incorrectly

Answer(s): B C D

10. Elastic load balancing can add cloud servers of different operating systems.

A. TRUE

B. FALSE

Answer(s): A

---

11. Which of the following databases can be protected by database security services?

☐ A. BMS self-built database

☐ B. ECS self-built database

☐ C. RDS relational database

☐ D. Answer to the database deployed in the customer's local computer room

Answer(s): A B C

---

12. Which of the following services are included in the Standard Edition Security Expert Service?

☐ A. Security reinforcement

☐ B. Host safety examination

☐ C. Safety monitoring

☐ D. The answer to the website security examination

Answer(s): B C D

---

13. Huawei provides developers with open capabilities, which will help developers integrate the open capabilities of Huawei products with their upper-layer applications and build differentiated innovative solutions.

A. TRUE

B. FALSE

Answer(s): A

---

14. After deleting the elastic scaling group, the elastic cloud server instances automatically created by elastic scaling will also be automatically deleted.

A. TRUE

B. FALSE

Answer(s): A

---

15. Which of the following are the application scenarios of elastic load balancing?

☐ A. Suitable for web services with large traffic

☐ B. Shield the real IP to achieve the purpose of security protection

☐ C. Provide based on domain name and URL routing balance capability

☐ D. Realize more flexible service forwarding

Answer(s): A B C

---

16. There is no need to delete the virtual gateway and virtual interface bound to the physical leased line when unsubscribing from the physical leased line.

A. TRUE

B. FALSE

Answer(s): B

---

17. In the event of disk data loss, how to use the pre-created backup to restore data?

☐ A. Create a new disk

☐ B. Restore the data to the original disk

☐ C. Delete

☐ D. Unmount the disk

Answer(s): A B

---

18. Which of the following security measures does relational database services have?

☐ A. Set up a virtual private cloud

☐ B. Bind elastic public network IP

☐ C. Use security group

☐ D. Use SSL Channel

Answer(s): A C D

---

19. Which types of cloud disks are used by elastic cloud servers?

☐ A. Super high I0

☐ B. high I0

☐ C. Local Disk

☐ D. Normal I0

Answer(s): A B D

---

20. Regarding the description of the security group, which of the following is wrong?

A. When configuring security group rules, the source address and destination address can only be set to IP addresses, not security groups

B. A security group is a logical grouping that provides access policies for elastic cloud servers that have the same security protection requirements and trust each other in the same VPC

C. The system will create a security group for each user by default. The rule of the default security group is that all data packets in the outbound direction are released, and access in the inbound direction is restricted. The elastic cloud servers in the same security group and the same VPC can by default. Mutual visit

D. After the security group is created, users can define various access rules in the security group. When the elastic cloud server joins the security group, Is protected by these access rules

Answer(s): A
