VMware Cloud Foundation 5.2 Administrator

1. Which settings should be configured in SDDC Manager for the deployment of VMware Aria Suite?

A. Network Settings

B. Storage Settings

C. Certificate Management

D. User Access Control

Answer(s): A

---

2. What is the primary use case for VMware Aria Operations?

A. Security Compliance

B. Cost Management

C. Backup Solutions

D. Performance Monitoring

Answer(s): D

---

3. When assessing a private cloud environment, which component of VMware Aria Suite is crucial for visibility and monitoring?

A. Aria Operations

B. Aria Network

C. Aria Suite Lifecycle

D. Aria Automation

Answer(s): A

---

4. What is the first step to take when a VM is experiencing network connectivity issues?

A. Check VM Network Settings

B. Inspect Physical Network

C. Review Host Logs

D. Validate NSX Configuration

Answer(s): A

---

5. What is a key benefit of using VMware Cloud Builder during the deployment of VMware Cloud Foundation?

A. Resource Monitoring

B. Data Backup

C. User Management

D. Time Efficiency

Answer(s): D

---

6. In a case study, a company plans to scale their infrastructure by adding more ESXi hosts. What should they validate first?

A. Current Capacity

B. Hardware Compatibility

C. Network Bandwidth

D. User Training

Answer(s): B

---

7. How often should certificates be monitored for expiration in VMware Cloud Foundation?

A. Daily

B. Annually

C. Monthly

D. Weekly

Answer(s): C

---

8. When configuring backup settings for VMware Cloud Foundation, which storage option is preferred for backups?

A. Local Storage

B. NFS Storage

C. vSAN

D. iSCSI

Answer(s): B

---

9. In a case study, a company's vCenter is showing certificate errors. What should the administrator check first?

A. Storage Capacity

B. Network Configuration

C. User Permissions

D. Certificate Validity

Answer(s): D

---

10. What is a key benefit of using VMware Cloud Foundation for private cloud implementations?

A. Vendor Lock-in

B. Simplified Management

C. Complex Setup

D. Increased Costs

Answer(s): B

---

11. When assessing the benefits of using Data Services Manager, which feature is key for data compliance?

A. User Permissions

B. Performance Metrics

C. Backup Auditing

D. Resource Tracking

Answer(s): C

12. In a case study, a company is implementing a VI workload domain. What should they focus on during deployment?

A. Network Configuration

B. User Training

C. Resource Allocation

D. Compliance Needs

Answer(s): C

---

13. Which VMware tool helps visualize network topology and troubleshoot connectivity issues in a vSphere environment?

A. NSX Manager

B. vSphere Client

C. vRealize Network Insight

D. SDDC Manager

Answer(s): C

---

14. Which tool can assist in verifying that the SDDC Manager has the correct network settings during deployment?

A. vSphere Client

B. SDDC Manager UI

C. vRealize Operations

D. NSX Manager

---

15. In a case study, a company is looking to deploy applications rapidly. What should they consider when enabling IaaS control plane?

A. Resource Availability

B. Compliance Needs

C. User Training

D. Network Configuration

Answer(s): A

---

16. What is the first step in configuring certificate management for VMware Cloud Foundation?

A. Install CA Certificates

B. Configure SSL

C. Validate Settings

D. Review Documentation

Answer(s): D

---

17. Which tool can help you visualize the data flow in VMware Aria Suite?

A. vSphere Client

B. NSX Manager

C. Aria Suite Dashboard

D. vRealize Operations

Answer(s): C

---

18. What is the recommended deployment method for VMware Cloud Foundation?

A. Hybrid Installation

B. Manual Installation

C. Automated Deployment

D. Cloud Deployment

Answer(s): C

---

19. What is a common practice for managing certificates in VMware Cloud Foundation?

A. Manual Renewal

B. Weekly Checks

C. User Notifications

D. Automated Renewal

Answer(s): D

---

20. In a case study, a company is experiencing issues with secure connections between their management components. What should they check first?

A. User Permissions

B. Network Configuration

C. Storage Capacity

D. Certificate Validity

Answer(s): D
