CyberArk Defender - PAM

1. What do you need on the Vault to support LDAP over SSL?

A. CA Certi cate(s) used to sign the External Directory certi cate
B. RECPRV.key
C. a private key for the external directory
D. self-signed Certi cate(s) for the Vault

Answer(s): A

2. You are troubleshooting a PVWA slow response. Which log les should you analyze rst? (Choose two.)

A. ITALog.log

B. web.con g

C. CyberArk.WebApplication.log

D. CyberArk.WebConsole.log

Answer(s): C D

3. What is the easiest way to duplicate an existing platform?

A. From PrivateArk, copy/paste the appropriate Policy.ini le; then rename it.

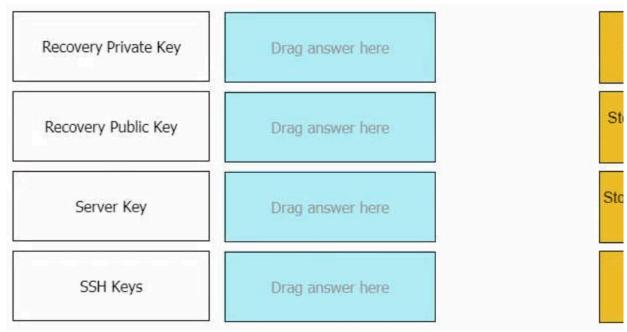

B. From the PVWA, navigate to the platforms page, select an existing platform that is similar to the new target account platform and then click Duplicate; name the new platform.

C. From PrivateArk, copy/paste the appropriate settings in PVCon guration.xml; then update the policyName variable.

D. From the PVWA, navigate to the platforms page, select an existing platform that is similar to the new target account platform, manually update the platform settings and click "Save as" INSTEAD of save to duplicate and rename the platform.

Answer(s): B

4. DRAG DROP (Drag and Drop is not supported). Match each key to its recommended storage location.

Recovery Private Key: Store in a Physical Safe

A. See Explanation section for answer.

Answer(s): A

5. Due to corporate storage constraints, you have been asked to disable session monitoring and recording for 500 testing accounts used for your lab environment. How do you accomplish this?

A. Master Policy>select Session Management>add Exceptions to the platform(s)>disable Session Monitoring and Recording policies

B. Administration>Platform Management>select the platform(s)>disable Session Monitoring and Recording

C. Polices>Access Control (Safes)>select the safe(s)>disable Session Monitoring and Recording policies

D. Administration>Con guration Options>Options>select Privilege Session Management>disable Session Monitoring and Recording policies

Answer(s): B

6. A user requested access to view a password secured by dual-control and is unsure who to contact to expedite the approval process. The Vault Admin has been asked to look at the account and identify who can approve their request.

What is the correct location to identify users or groups who can approve?

A. PVWA > Administration > Platform Con guration > Edit Platform > UI & Work ow > Dual Control > Approvers

B. PVWA > Policies > Access Control (Safes) > Select the safe > Safe Members > Work ow > Authorize Password Requests

C. PVWA > Account List > Edit > Show Advanced Settings > Dual Control > Direct Managers

D. PrivateArk > Admin Tools > Users and Groups > Auditors (Group Membership)

Answer(s): B

7. What must you specify when con guring a discovery scan for UNIX? (Choose two.)

A. Vault Administrator
B. CPM Scanner
C. root password for each machine
D. list of machines to scan
E. safe for discovered accounts

Answer(s): B D

8. To change the safe where recordings are kept for a speci c platform, which setting must you update in the platform con guration?

A. SessionRecorderSafe
B. SessionSafe
C. RecordingsPath
D. RecordingLocation

Answer(s): A

9. Which processes reduce the risk of credential theft? (Choose two.)

\square	A. require	dual co	ntrol p	assword	access	approval
\Box	7. require	uuuu oo	nuoi p	assivora	4000000	appiovai

- □ B. require password change every X days
- C. enforce check-in/check-out exclusive access
- D. enforce one-time password access

Answer(s): C D

10. You are onboarding 5,000 UNIX root accounts for rotation by the CPM. You discover that the CPM is unable to log in directly with the root account and will need to use a secondary account. How can this be con gured to allow for password management using least privilege?

A. Con gure each CPM to use the correct logon account.

B. Con gure each CPM to use the correct reconcile account.

- C. Con gure the UNIX platform to use the correct logon account.
- D. Con gure the UNIX platform to use the correct reconcile account.

Answer(s): C

11. DRAG DROP (Drag and Drop is not supported).

ADR Vault became active due to a failure of the primary Vault. Service on the primary Vault has now been

Unordered Options

In the PADR.ini file, set Failover Mode = No and remove the last two lines.

Start the PrivateArk Disaster Recovery Service.

Ð

A. See Explanation section for answer.

Answer(s): A

12. Which methods can you use to add a user directly to the Vault Admin Group? (Choose three.)

A. REST API
B. PrivateArk Client
C. PACLI
D. PVWA
E. Active Directory
F. Sailpoint

Answer(s): A B E

13. Which Automatic Remediation is con gurable for a PTA detection of a "Suspected Credential Theft"?

 A. Add to Pending

 B. Rotate Credentials

 C. Reconcile Credentials

D. Disable Account

Answer(s): B

14. Which item is an option for PSM recording customization?

A. Windows events text recorder with automatic play-back

B. Windows events text recorder and universal keystrokes recording simultaneously

C. Universal keystrokes text recorder with windows events text recorder disabled

Answer(s): B

15. DRAG DROP (Drag and Drop is not supported). Match the built-in Vault user with the correct de nition.

This user appears on the highest level of the User hierarchy and has all the possible permissions. As such, it can create and manage other Users on any level on the Users' hierarchy.

Drag answer here

Drag answer here

This user appears at the top of the User hierarchy, enabling it to view all the Users and accounts in the Safes. The user can produce reports of Safe activities and User activities, which enables it to keep track of activity in the Safe and User requirements.

This user is an internal user that cannot be logged onto and carries out internal tasks, such as automatically clearing expired user and Safe history.

This user has all available Safe member authorizations except Authorize password requests. This user has complete system control, manages a full recovery when necessary and cannot be removed from any Safe.

A. See Explanation section for answer.

Answer(s): A

16. You want to create a new onboarding rule. Where do you accomplish this?

A. In PVWA, click Reports > Unmanaged Accounts > Rules

B. In PVWA, click Options > Platform Management > Onboarding Rules

C. In PrivateArk, click Tools > Onboarding Rules

D. In PVWA, click Accounts > Onboarding Rules

17. What does the Export Vault Data (EVD) utility do?

A. exports data from the Vault to TXT or CSV les, or to MSSQL databases

B. generates a backup le that can be used as a cold backup

C. exports all passwords and imports them into another instance of CyberArk

D. keeps two active vaults in sync

Answer(s): A

18. When are external vault users and groups synchronized by default?

A. They are synchronized once every 24 hours between 1 AM and 5 AM.

B. They are synchronized once every 24 hours between 7 PM and 12 AM.

C. They are synchronized every 2 hours.

D. They are not synchronized according to a speci c schedule.

Answer(s): A

19. You created a new safe and need to ensure the user group cannot see the password, but can connect through the PSM.

Which safe permissions must you grant to the group? (Choose two.)

A. List Accounts
B. Use Accounts
C. Access Safe without Con rmation
D. Retrieve Files
E. Con rm Request

Answer(s): A B

20. During a High Availability node switch you notice an error and the Cluster Vault Manager Utility fails back to the original node. Which log les should you check to investigate the cause of the issue? (Choose three.)

A. CyberArk Webconsole.log
B. VaultDlog
C. PM_Error.log
D. ITALog.log
E. ClusterVault.console.log

F. logiccontainer.log

Answer(s): B C D
