

Huawei Certified Network Specialist

1. The fire-fighting measures that can be used in the Class A computer room include:

A. Gas Fire Extinguishing System

B. Water mist fire extinguishing system

C. Automatic sprinkler system

D. All of the above

Answer(s): A

2. The water inlet gradient of the condensate pan of the fan coil unit should not be less than ?

A. 0.01

B. 0.02

C. 0.05

D. 0.1

Answer(s): A

3. The UPS5000-E power module adopts the fan fault-tolerant design.

When two of the fans are damaged, what percentage of the load can the power module still carry?

A. 0.2

B. 0.3

C. 0.5

D. 0.6

Answer(s): B

4. What is the total IT load power of the FusionModule1000A V2R3 version 40-foot IT solution?

A. 52kW

B. 55kW

C. 70kW

D. 72kW

Answer(s): A

5. Which of the following models can be equipped with an external high-capacity battery charger for fast recharging? ()

A. UPS5000-A

B. UPS5000-E

C. UPS2000-A 6/10K Professional Labeling Machine

D. UPS2000-G 6K long

Answer(s): C

6. In FusionModule2000, how to adapt the skylight when the column occupies the closed passage space in the scene around the column?

A. Customized tempered glass flip skylight

B. Field machining with control skylight

C. On-site cutting with plexiglass adjustable skylight

D. Sealed with special adjustable sealing plate for skylight

Answer(s): D

7. The capacity management module of the NetEco management system can manage the resource capacity information in the computer room.

Which of the following capacity elements is under the management of NetEco?

A. Network port

B. Network Bandwidth

C. CPU utilization

D. None of the above is supported

Answer(s): D

8. What are the options in the typical configuration of FusionModule800?

A. Temperature and humidity, door sensor, water immersion, smoke sensor, mobile phone APP

B. Smoke sensor, door sensor, water immersion, SMS alarm, pad

C. Water immersion, door sensor, video, backup power, ibattery

Answer(s): B

9. The wrong description about the reliability of NetCol5000-C row-level air conditioner is:

A. It adopts dual power supply, and the two power supply adopts automatic switching mode

B. Operators, large data centers such as large corporate headquarters prefer this type of air conditioner, and small and medium-sized enterprises are more likely to use NetCol5000-A air conditioners

C. Multi-fan air supply: online maintenance is possible

D. Cannot be used in scenarios without raised floor, because condensate drainage cannot be connected to the pipe

Answer(s): D

10. For the UPS5000-A system, which of the following battery configurations is unreasonable: ()
(multiple choice)

A. 32 12V batteries

B. 37 12V batteries

C. 40 12V batteries

D. 42 12V batteries

Answer(s): B

11. PDU8000 precision power distribution cabinet protection level:

A. IP20

B. IP21

C. IP30

D. IP40

Answer(s): A

12. What kind of cable entry and exit methods can be realized by the FusionModule2000 integrated power distribution cabinet?

A. Top-in and online-exit

B. Top-in and bottom-out lines

C. Down in and out on the line

D. Down in and out of the line

Answer(s): A

13. The battery type supported by UPS2000-G is ().

A. VRLA

B. Lithium battery

C. Nickel-cadmium battery

D. Flywheel

Answer(s): A

14. The NetEco management system adopts a large-capacity design architecture, which can support access to a large number of devices, and supports the use of a single X86 server to achieve access to () 10,000 test points. At the same time, the system operates smoothly, and the CPU utilization is not higher than () ?

A. 50, 70

B. 100, 70

C. 50, 90

D. 100, 90

Answer(s): D

15. UPS2000-G-(6K- 20K) has a strong lightning protection design in the industry, lightning protection level (), surge protection level (), can avoid 90 failures caused by lightning strikes, and reliably protect the exchange of back-end equipment. input port.

A. 5kA; 6kV

B. 2kA; 4kV

C. 2kA; 6kV

D. 4kA; 6kV

Answer(s): A

16. The UPS5000-E has the function of adjusting the number of battery cells, which avoids the failure of a single battery to cause the replacement of the entire group, and solves the problem of difficult maintenance of traditional UPS batteries. May I ask how many cells can be adjusted in the UPS5000-E (50kVA module)? ()

A. 30-40

B. 32-40

C. 32-42

D. 30-44

Answer(s): D

17. The total current of the battery pack is 1000A, and it is equipped with 3 sets of batteries. The most economical configuration of the cable from the main switch box to the sub-switch box is: ()

A. 95mm² (328A) x2

B. 120mm² (382A) x2

C. 150mm² (441A) x2

D. 185mm 2 (506A) X1

Answer(s): A

18. Which of the following statements is false about surveillance cameras?

A. Less than 4 cameras can be connected to the ETH socket

B. The camera power supply mode is PoE power supply

C. The camera can be directly connected to the switch powered by PoE

D. Camera data can be stored through TF card or VCN500

E. The number of cameras configured is the same as the number of control sunroofs

Answer(s): E

19. The NetCol5000-A042H full-cabinet row-level air-cooled variable frequency precision air conditioner supports a cooling capacity adjustment range of (), which can continuously cool under low load in the afternoon and avoid temperature and humidity fluctuations and unit reliability problems caused by frequent start and stop.

A. 10~100

B. 15~100

C. 20~100

D. 25~100

Answer(s): A

20. The NetEco6000 management system can use Huawei eSpace VCN500 products to realize video storage: Can one VCN500 product be connected to () cameras?

A. 32

B. 64

C. 128

D. 256

Answer(s): A
