

Huawei Certified Network Specialist

1. When a developer uses HarmonyOS Device Manager, he wrote the following code, which code description is correct?

`VardeviceInfo=dmlInstance.getLocalDeviceInfoSync () :`

A. Obtain the local device information synchronously

B. Asynchronously obtain the list of trusted devices

C. Obtain the list of trusted devices synchronously

D. Asynchronously obtain local device information

Answer(s): C

2. Which of the following atomic layout capabilities does not belong to the position of the control element?

A. Percentage

B. Hidden

C. Split the line

D. stretch

Answer(s): D

3. When I use the interface to set the system time in HarmonyOS, which of the following is the smallest time unit?

A. minute

B. seconds

C. microseconds

D. ms

Answer(s): D

4. Which of the following products belongs to the security products in the smart home ecology?

A. Large-screen refrigerator

B. smart door lock

C. Rice cooker

D. Water heater

Answer(s): B

5. When a HarmonyOS app developer uses the form container, which of the following elements can be submitted and reset?

A. Menu

B. List

C. Input

D. Image

Answer(s): C

6. Browse articles in the reading app on your phone, migrate to the tablet to continue viewing, and exit the reading app on your phone.

Which HarmonyOS streaming solution is used in this scenario?

A. Multi-terminal migration

B. Multi-terminal collaboration

C. Cross-terminal collaboration

D. Cross-terminal migration

Answer(s): D

7. What is the process of cross-terminal migration from an application on HarmonyOS device A to the application on device B by calling the distributed task scheduling capability to continue sbility?

A. Preparation for circulation

B. Circulation

C. End of circulation

D. The circulation is complete

Answer(s): D

8. Which of the following modules does a developer need to call to check whether the HarmonyOS cellular data service is enabled?

A. @ohos.telephony.sms

B. @ohos.telephony.data

C. @ohos.telephony.sim

D. @ohos.telephony.call

Answer(s): A

9. Which of the services provided by the HarmonyOS Connect solution is Device Partner?

A. Official Documentation

B. Service platform

C. Training support

D. Certification Testing

Answer(s): B

10. After the creation of a custom component of the Web development paradigm, which of the following callbacks will be triggered when it is added to the Page component tree?

A. OnInit

B. OnAttached

C. OnLayoutReady

D. OnDetached

Answer(s): A

11. Which of the following modules provides an E2E encrypted channel in the HarmonyOS streaming architecture to provide a secure cross-terminal transmission mechanism for user applications?

A. distributed soft bus

B. Forwarding task management services

C. Distributed security

D. Distributed task scheduling

Answer(s): C

12. Which of the following interfaces can repeatedly call a function with a fixed time delay between each call?

A. setTimeout?

B. setInterval

C. clearTimeout

D. clearInterval

Answer(s): B

13. Which of the following is NOT part of the software exposure capabilities provided by HarmonyOS Connect?

A. chip

B. Cloud services

C. Huawei HarmonyOS operating system

D. Device Partner Platform

Answer(s): A

14. In the declarative development paradigm, which of the following decorator decorated state variables needs to be initialized locally, and the initialized value can be overridden by the construction parameters?

A. @State

B. @ObjectLink

C. @StorageLink

D. @Prop

Answer(s): A

15. In the HarmonyOS system architecture, which of the following can shield the differences between multiple cores and provide basic kernel capabilities for the upper layer?

A. Ability

B. KAL (Kernel Abstract Layer)

C. UI

D. HDF (Hardware Driver Foundation)

Answer(s): B

16. When a developer uses Page Ability to open a ServiceAbility, he needs to pass parameters through Intent, at what stage is the parameter obtained in the whole process null?
onStart() in A S ervice.

A. bility

B. PageAbility

C. ServiceAbility

D. ServiceAbility

Answer(s): B

17. When a developer clicks the exit button of an application to release Page Ability resources, which callback method in the Page Ability lifecycle will be triggered?

A. onStop()

B. onInactive()

C. onForeground()

D. onBackground()

Answer(s): A

18. In order to help users find data in the app through the global search app, a HarmonyOS developer needs to index the data of the app and configure the global search searchable entities. Which of the following interfaces can the developer choose to index their application data?

A. Converged search interface

B. Distributed data service interface

C. Data storage management interface

D. Relational data services

Answer(s): A

19. Which of the following fields is not within the scope of permission?

A. privileged

B. signature

C. restricted

D. deivced

Answer(s): D

20. If a HarmonyOS engineer is about to debug a HarmonyOS application on an emulator device, which of the following debugging processes is correct?

A. Check the properties of the config.json file set the installation method of the hap package set the debugging code type start debugging

B. Set the installation mode of the HAP package set the debugging code type check the properties of the configjson file start debugging

C. Set the installation method of the HAP package check the properties of the configjson file set the debugging code type start debugging

D. Set the debugging code type check the properties of the config.json file set the installation method of the HAP package start debugging

Answer(s): D
