D. On Computer1, create an inbound rule and select the Allow the connection if it is secure option.

E. On Computer1, create an outbound rule and select the Allow the connection if it is secure option.

F. On all of the servers, create a connection security rule.

Answer(s): A,C,F

---

2. You run a Windows 2012 R2 Hyper-V Role Server, you need to shrink the size of files.vhd (200GB).

A. Compact

B. Shrink

C. Resize

D. Convert

Answer(s): D

3. You have a server named Server1 that runs Windows Server 2012 R2. Server1 has six network adapters. Two of the network adapters are connected to a network named LAN1, two of the network adapters are connected to a network named LAN2, and two of the network adapters are connected to a network named LAN3.

A. 3

B. 4

C. 6

D. 8

Answer(s): B

---

4. You have a server named Server1 that runs a Server Core Installation of Windows Server 2012 R2 Datacenter.

A. Index 1

B. Index 2

C. Index 3

D. Index 4

Answer(s): B,D

---

5. Your network contains an Active Directory forest named contoso.com. All domain controllers currently run Windows Server 2008 R2.

A. Install the DNS Server role.

B. Enable the global catalog server.

C. Install the Active Directory Certificate Services role.

D. Transfer the schema master.

Answer(s): C,D

---

6. You work as an administrator at Contoso.com. The Contoso.com network consists of a single domain named Contoso.com. All servers in the Contoso.com domain, including domain controllers, have Windows Server

A. You should consider copying the policies folder to the PolicyDefinitions folder in the Contoso.com domain's SYSVOL folder.

B. You should consider copying the PolicyDefinitions folder to the policies folder in the Contoso.com domain's SYSVOL folder.

C. You should consider copying the PolicyDefinitions folder to the policies folder in the Contoso.com domain's systemroot folder.

D. You should consider copying the PolicyDefinitions folder to the policies folder in the Contoso.com domain's logonserver folder.

Answer(s): B

---

7. A company's server administration team would like to take advantage of the newest file systems available with Windows Server 2012 R2. The team needs a file system capable of managing extremely large data drives that can auto-detect data corruption and automatically perform needed repairs without taking a volume offline.

A. NFS

B. DFS

C. NTFS

D. ReFS

Answer(s): D

8. You have a server named Server1 that has the Print and Document Services server role installed.

A. Start the Printer Extensions and Notifications service and set the service to start automatically.

B. Install the LPD Service role service.

C. Start the Computer Browser service and set the service to start automatically.

D. Install the Internet Printing role service.

Answer(s): D

---

9. You work as an administrator at Contoso.com. The Contoso.com network consists of a single domain named Contoso.com. All servers on the Contoso.com network have Windows Server 2008 R2 installed. Some of Contoso.com's workstations have Windows 7 installed, while the rest have Windows 8 installed.

A. You should consider configuring the Shadow Copies settings on the new server.

B. You should consider configuring the Snapshot settings on the new server.

C. You should consider configuring the Background Copy settings on the new server.

D. You should consider configuring the Permission settings on the new server.

Answer(s): A

---

10. NO: 431

A. Set-DnsPreferredClientServerAddress

B. Set-DnsClientServerAddress

C. Set-DnsClient

D. Register-DnsClient

Answer(s): B

---

11. Your network contains an Active Directory domain named contoso.com. All client computer accounts are in an organizational unit (OU) named AllComputers. Client computers run either Windows 7 or Windows 8.

A. The Security settings of GP1

B. The Block Inheritance option for AllComputers

C. The Security settings of AllComputers

D. The WMI filter for GP1

Answer(s): D

---

12. You work as a senior administrator at Contoso.com. The Contoso.com network consists of a single domain named Contoso.com. All servers on the Contoso.com network have Windows Server 2012 R2 installed.

A. It removes one or more network adapters from a specified NIC team.

B. It removes a team interface from a NIC team.

C. It removes a specified NIC team from the host.

D. It removes a network adapter member from a switch team.

Answer(s): C

---

13. You have virtual machine named VM1.

A. Shrink

B. Compact

C. Convert

D. Merge

Answer(s): A

---

14. Your network contains an Active Directory domain named contoso.com. The domain contains two member servers named Server1 and Server2 that run Windows Server 2012 R2. You log on to Server1. You need to retrieve the IP configurations of Server2. Which command should you run from Server1?

A. winrs -r:server2 ipconfig

B. winrm get server2

C. ipconfig > server2.ip

D. dsquery *-scope base-attr ip, server2

Answer(s): A

---

15. How can you manage a newly installed Windows Server 2012 R2 core from another Windows Server 2012 R2 with computer manager?

A. 1

B. 8

C. 2

D. 4

Answer(s): A

16. Your network contains an Active Directory domain named contoso.com. The domain computers that use IPV4 and IPv6.

A. Run the Export-DhcpServer cmdlet and specify the Leases parameter.

B. Run the Get-DhcpServer4Lease cmdlet and specify the -AllLease parameter.

C. Run the Add-DhcpServer4Leave cmdlet and specify the -hostname parameter.

D. Run the Send-SmigServerData cmdlet and specify the -computername cmdlet.

Answer(s): A

---

17. Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server 2012. You create a group Managed Service Account named gservice1. You need to configure a service named Service1 to run as the gservice1 account. How should you configure Service1?

A. From Windows PowerShell,run Set-Service and specify the -PassThrough parameter

B. From a command prompt, run sc.exe and specify the config parameter.

C. From Windows PowerShell,run Set-Service and specify the -StartupType parameter

D. From Services Console configure the General settings

Answer(s): B

---

18. Your network contains two Active Directory forests named contoso.com and adatum.com. Each forest contains one domain. A two-way forest trust exists between the forests.

A. A trust point

B. A GlobalNames zone

C. A delegation

D. A conditional forwarder

Answer(s): D

---

19. You have a Hyper-V host named Server1 that runs Windows Server 2012 R2.

A. Set-VMNetworkAdapter

B. Set-NetLbfoTeam

C. Set-NetLbfoTeamNic

D. Set-VMSwitch

Answer(s): B

---

20. Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2 that run Windows Server 2012 R2.

A. Security Templates

B. Computer Management

C. Security Configuration and Analysis

D. System Configuration

Answer(s): C
