

Huawei HCIP Collaboration v3.0

1. Network recording and broadcasting does not occupy any resources of the MCU, and there is no interference with the running status of the video conference.

A. True

B. Error

Answer(s): B

2. H.225 contains which of the following signalings ().

A. RAS

B. Q.931

C. H.281

D. T.120

Answer(s): A,B

3. The main role of the 317.H.245 protocol is ().

A. Real-time transmission

B. Media Control

C. Competency Consultation

D. Video encoding

Answer(s): B,C

4. The following socket on the MCU is the default service network port. ()

A. GE0

B. FE

C. RS232

D. GE1

Answer(s): A

5. In the Early state, dialog can be terminated by (). (3 answers).

A. Called Failure Response

B. Called to send BYE

C. The caller sends a BYE

D. The caller sends CANCEL

Answer(s): A,C,D

6. In video conference rooms, the illuminance cannot be too low because whether it is a CCD or CMOS, the camera will have a lot of snowflake noise in low light.

A. False

B. True

Answer(s): B

7. Which of the following actions will prevent users from dialing the MCU's IVR number from the terminal to create a meeting?

A. Remove all MCU board

B. Change terminal registration number

C. Change the MCU registration number

D. Register the endpoint on the GK where the MCU resides

Answer(s): A

8. When the MCU is operating in wall riding mode, GE0 and GE1 must be in two different network segments, and all board GE0 (or GE1) must be in the same network segment.

A. False

B. True

Answer(s): B

9. The MCU encodes each terminal image that needs to be added to the multi-screen combination, and when combined into a road image, it is transmitted to all terminals viewing the multi-screen

A. False

B. True

Answer(s): B

10. Currently, the MCU supports the upgrade methods ().

A. All of the above can be answered

B. Web upgrade

C. FTP Upgrade

D. Minimize Upgrade

Answer(s): B,C

11. Due to the size of the display and the limitation of MCU resources, the number of multi-screen sprites generally does not exceed 16 sprites, otherwise the image is too small and the picture will not be clear.

A. False

B. True

Answer(s): B

12. Due to the size of the display and the resource limitations of the MCU , the number of multi-screen sprites generally does not exceed 24 , otherwise the image is too small and the picture will not be clear.

A. False

B. True

Answer(s): B

13. The quality of digital audio depends on which factors. ()

A. Sample frequency

B. Channel count

C. Quantization of the number of digits

D. bandwidth

Answer(s): A,B,C

14. Dialogs can be divided into INVITE transactions and non-INVITE transactions, where the INVITE transaction in turn includes a request message and a response message.

A. False

B. True

Answer(s): B

15. Illuminance, expressed in terms of the luminous flux accepted per unit area, is expressed in lux (Lux , lx). ()

A. False

B. True

Answer(s): B

16. T.140 Subtitles support sending and receiving subtitles from SIP, H.323 type terminals.

A. False

B. True

Answer(s): A

17. The following description of the relationship between the RTCP port number and the RTP port number is correctly ().

A. RTCP Side Slogan 2 RTP Port number -1

B. RTCP Side Slogan 2 RTP Port Number +1

C. RTCP Side Slogan 2 RTP Port Number+2

D. RTCP port number twoRTP port number

Answer(s): B

18. capability negotiation is primarily used to declare the receiving and sending capabilities supported by this side. When declaring the priority capability set of this end, the other party needs to prioritize the use of the ability set.

A. False

B. True

Answer(s): B

19. Nlog v2.0 can export network packet drop data for all venues in a meeting

A. False

B. True

Answer(s): B

20. supports up to 1080i dual-stream, which is the industry's highest dual-stream processing capability.

A. False

B. True

Answer(s): A
