

Managing Modern Desktops

1. You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

A. Install-Module WindowsAutoPilotIntune

B. Install-Script Get-WindowsAutoPilotInfo

C. Import-AutoPilotCSV

D. Get-WindowsAutoPilotInfo

Answer(s): A

2. What should you configure to meet the technical requirements for the Azure AD-joined computers?

A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.

B. The Accounts options in an endpoint protection profile.

C. The Password Policy settings in a Group Policy object (GPO).

D. A password policy from the Microsoft Office 365 portal.

Answer(s): A

3. HOTSPOT (Drag and Drop is not supported)

You need to meet the OOB requirements for Windows AutoPilot.

Which two settings should you configure from the Azure Active Directory blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

11 AM	
10 PM	
11 PM	

Update Active Hours End to:

	▼
10 AM	
11 AM	
10 PM	
11 PM	

A. See Explanation section for answer.

Answer(s): A

6. HOTSPOT (Drag and Drop is not supported)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Specify ComputerName as:

	⌵
"HR"+ RAND(4)	
"HumanResources-" + RAND(????)	
HR-%RAND:4%	
HR-????	
HumanResources-%RAND:4%	

Specify AccountOU as:

	⌵
CN=Computers, CN=HR, DC=Contoso, DC=com	
Computers/HumanResources/Contoso.com	
Contoso.com/HR/Computers	
OU=Computers, OU=HR, DC=Contoso, DC=com	

A. See Explanation section for answer.

Answer(s): A

7. You need to prepare for the deployment of the Phoenix office computers. What should you do first?

A. Extract the hardware ID information of each computer to a CSV file and upload the file from the Devices settings in Microsoft Store for Business.

B. Generalize the computers and configure the Device settings from the Azure Active Directory blade in the Azure portal.

C. Extract the serial number information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.

D. Extract the hardware ID information of each computer to an XML file and upload the file from the Devices settings in Microsoft Store for Business.

Answer(s): A

8. HOTSPOT (Drag and Drop is not supported)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

A. See Explanation section for answer.

Answer(s): A

9. You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements.

To what should you grant the right to create the computer objects?

A. Server2

B. Server1

C. GroupA

D. DC1

Answer(s): B

10. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes
If User1 joins a Windows 10 device to Azure AD, the device will be enrolled in Intune automatically.	<input type="radio"/>
If User2 joins a Windows 10 device to Azure AD, the device will be enrolled in Intune automatically.	<input type="radio"/>
If User3 joins a Windows 10 device to Azure AD, the device will be enrolled in Intune automatically.	<input type="radio"/>

A. See Explanation section for answer.

Answer(s): A

11. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Autopilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You perform a remote Windows AutoPilot Reset.

Does this meet the goal?

A. Yes

B. No

Answer(s): B

12. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Autopilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot user-driven deployment profile.

Does this meet the goal?

A. Yes

B. No

Answer(s): A

13. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Autopilot to configure the computer settings of computers issued to users.

A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company.

You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot self-deploying deployment profile.

Does this meet the goal?

A. Yes

B. No

Answer(s): B

14. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically on a Windows 10 computer during a maintenance window.

Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Random Delay.

Does this meet the goal?

A. Yes

B. No

Answer(s): A

15. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically on a Windows 10 computer during a maintenance window.

Solution: From the Windows Update settings, you enable Configure Automatic Updates, select 4-Auto download and schedule the install, and then enter a time. Does this meet the goal?

A. Yes

B. No

Answer(s): B

16. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically on a Windows 10 computer during a maintenance window.

Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Activation Boundary. Does this meet the goal?

A. Yes

B. No

Answer(s): B

17. DRAG DROP (Drag and Drop is not supported)

Your company has a computer named Computer1 that runs Windows 10. Computer1 was used by a user who left the company.

You plan to repurpose Computer1 and assign the computer to a new user. You need to redeploy Computer1 by using Windows AutoPilot.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

Upload the file by using Microsoft Intune.

Generate a CSV file that contains the computer information.

Upload the file by running `azcopy.exe`.

Generate a JSON file that contains the computer information.

Reset the computer.

A. See Explanation section for answer.

Answer(s): A

18. HOTSPOT (Drag and Drop is not supported)

Your company has an infrastructure that has the following:

- A Microsoft 365 tenant
- An Active Directory forest
- Microsoft Intune

- A Key Management Service (KMS) server
 - A Windows Deployment Services (WDS) server
 - A Microsoft Azure Active Directory (Azure AD) Premium tenant
- The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Management tool:

<input type="checkbox"/>	Azure Active Directory admin center
<input type="checkbox"/>	Microsoft Endpoint Management admin center
<input type="checkbox"/>	Volume Activation Management Tool console
<input type="checkbox"/>	Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>	Device serial number and hardware hash
<input type="checkbox"/>	MAC address and computer name
<input type="checkbox"/>	Volume License Key and computer name

A. See Explanation section for answer.

Answer(s): A

19. Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business. You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
Phone Sign-in		
Allow enumeration of emulated smart card for all users	Not configured	No
Turn off smart card emulation	Not configured	No
Use PIN Recovery	Not configured	No
Use a hardware security device	Not configured	No
Use biometrics	Enabled	No
Configure device unlock factors	Not configured	No
Configure dynamic lock factors	Enabled	No
Use Windows Hello for Business	Enabled	No
Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Facial recognition
- B. A smartwatch that is Bluetooth-enabled
- C. A PIN
- D. A USB key

Answer(s): A C

20. You have 10 computers that run Windows 7 and have the following configurations:

- A single MBR disk
- A disabled TPM chip
- Disabled hardware virtualization
- UEFI firmware running in BIOS mode
- Enabled Data Execution Prevention (DEP)

You plan to upgrade the computers to Windows 10.

You need to ensure that the computers can use Secure Boot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Convert the MBR disk to a GPT disk

B. Enable the TPM chip.

C. Disable DEP

D. Enable hardware virtualization

E. Convert the firmware from BIOS to UEFI.

Answer(s): A E
