

Microsoft 365 Fundamentals

1. DRAG DROP (Drag and Drop is not supported)

Your company plans to migrate from on-premises to a hybrid cloud deployment.

You are required to make sure that the Microsoft platform used for the migration offers hybrid abilities. Which of the following options meet the requirement? Answer by dragging the correct option/s from the list to the answer area.

Select and Place:

Options	Answer
Microsoft Office Delve	
Microsoft SharePoint	
Microsoft Yammer	
Microsoft Skype for Business	
Microsoft Teams	

A. See Explanation section for answer.

Answer(s): A

2. DRAG DROP (Drag and Drop is not supported)

You are implementing Azure cloud services.

Match each scenario to its service. To answer, drag the appropriate scenario from the column on the left to its cloud service on the right. Each scenario may be used only once.

NOTE: Each correct selection is worth one point.

Select and Place:

Scenarios	Service	Scen
Exchange Online integrated with on-premises Exchange Server 2019	Software as a service (SaaS)	
Custom web and mobile application securely connected to an on-premises data store	Platform as a service (PaaS)	
Server-based workloads on a virtual machine connected to an on-premises network	Infrastructure as a service (IaaS)	

A. See Explanation section for answer.

Answer(s): A

3. You need to consider the underlined segment to establish whether it is accurate. All applications will remain in a hybrid environment after migrating to Microsoft Azure. Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required.

B. Applications that manage sensitive information

C. Applications where access requires a USB-token device

D. All legacy applications

Answer(s): D

4. You need to identify which Microsoft platforms provide hybrid capabilities for migrating from an on-premises deployment. Which two platforms provide hybrid capabilities for migration? Each correct answer provides a complete solution. (Choose two.)
NOTE: Each correct selection is worth one point.

A. Microsoft Skype for Business

B. Microsoft Yammer

C. Microsoft Exchange

D. Microsoft Teams

Answer(s): A C

5. Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements. Your company plans to move their Server environment to the cloud. You have been tasked with identifying a cloud model that allows for the current email environment to be upgraded, while also reducing server and application maintenance. You need to make sure that the requirements are met.
Solution: You recommend the Platform as a service (PaaS) model. Does the solution meet the goal?

A. Yes

B. No

Answer(s): B

6. A company is moving to Microsoft Azure. Some applications cannot be moved. You need to identify which applications will remain in a hybrid environment after the migration. Which applications will remain in a hybrid environment?

A. applications that manage sensitive information

B. applications that use a USB-token device to control access

C. legacy applications that use a message-based interface

D. a new server that runs several line-of-business applications

Answer(s): B

7. Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company plans to move their Server environment to the cloud.

You have been tasked with identifying a cloud model that allows for the current email environment to be upgraded, while also reducing server and application maintenance.

You need to make sure that the requirements are met.

Solution: You recommend the Infrastructure as a service (IaaS) model.

Does the solution meet the goal?

A. Yes

B. No

Answer(s): B

8. HOTSPOT (Drag and Drop is not supported)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area		
Statement	Yes	No
Microsoft cloud services offer significant energy savings for Microsoft and its customers.	<input type="radio"/>	<input type="radio"/>
Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.	<input type="radio"/>	<input type="radio"/>
Microsoft cloud services offer security options and have the ability to provision resources quickly.	<input type="radio"/>	<input type="radio"/>

A. See Explanation section for answer.

Answer(s): A

9. DRAG DROP (Drag and Drop is not supported)

You are the Microsoft 365 administrator for a company.

You must provide infrastructure recommendations. All proposed solutions must minimize costs. You need to identify the appropriate cloud model for the given scenarios.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct requirements. Each cloud model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point. Select and Place:

Answer area

Cloud models	Requirement	Cloud model
Private	Provide an on-demand sandbox environment.	Cloud model
Public	Provide failover capabilities between resources that you manage and resources in other regions.	Cloud model
Hybrid	Deploy virtual machines that supports USB devices.	Cloud model

A. See Explanation section for answer.

Answer(s): A

10. Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company plans to move their Server environment to the cloud.

You have been tasked with identifying a cloud model that allows for the current email environment to be upgraded, while also reducing server and application maintenance.

You need to make sure that the requirements are met.

Solution: You recommend the Software as a service (SaaS) model. Does the solution meet the goal?

A. Yes

B. No

Answer(s): A

11. Your company makes use of Platform as a Service (PaaS) for their Azure solution.

Which of the following options are components that your IT employees are responsible for?

A. Networks.

B. Databases.

C. Applications.

D. Servers.

Answer(s): C

12. You are the Microsoft 365 administrator for a company.

The company runs SharePoint Server and Exchange Server in an on-premises datacenter. The site collection for the finance department is currently encrypted using third-party software.

You need to move as many services to Microsoft 365 as possible. What should you do?

A. Migrate all SharePoint data and Exchange mailboxes to Microsoft 365.

B. Leave SharePoint data for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.

C. Leave mailboxes for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.

D. Leave SharePoint data and mailboxes for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.

Answer(s): A

13. A company has an Exchange Server environment. The company plans to migrate to the cloud. You need to recommend a cloud model that meets the following requirements:

- Upgrade the existing email environment
- Minimize server and application maintenance

Which model should you recommend?

- A. Platform as a service (PaaS)
- B. Windows as a service (WaaS)
- C. Software as a service (SaaS)
- D. Infrastructure as a service (IAAS)

Answer(s): C

14. Your company makes use of Platform as a Service (PaaS) for their Azure solution.

Which of the following options are components that Microsoft are responsible for? (Choose all that apply).

- A. Storage.
- B. Databases.
- C. Applications.
- D. Operating system.

Answer(s): A B D

15. DRAG DROP (Drag and Drop is not supported)

You are the Azure administrator for a company. The company uses only Platform as a Service (PaaS).

You need to identify which solution components Microsoft must manage and which solution components your IT staff must manage.

Match each management owner to its component. To answer, drag the responsible party from the column on the left to its component on the right. Each party may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point. Select and Place:

Answer Area

Responsible parties	Component	Responsible party
<input type="checkbox"/> IT staff	Applications	<input type="text"/>
<input type="checkbox"/> Microsoft	Operating systems	<input type="text"/>
	Storage	<input type="text"/>
	Application data	<input type="text"/>

A. See Explanation section for answer.

Answer(s): A

16. Your company is planning to migrate to Microsoft Azure and Microsoft 365. You are required to identify a cloud service that allows for website hosting. Which of the following is the model you should choose?

A. Software as a Service (SaaS)

B. Platform as a Service (PaaS)

C. Infrastructure as a Service (IaaS)

D. Container as a Service (CaaS)

Answer(s): B

17. DRAG DROP (Drag and Drop is not supported)

An organization is moving to Microsoft Azure and Microsoft 365. You need to classify the following components:

-website hosting

-a virtual machine that runs Linux

-document storage that uses OneDrive for Business

Match each component to its classification. To answer, drag the appropriate components from the column on the left to its classifications on the right. Each component may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Classifications	Answer Area	Component
Platform as a service (PaaS)	website hosting	<input type="checkbox"/>
Software as a service (SaaS)	a virtual machine that runs Linux	<input type="checkbox"/>
Infrastructure as a service (IaaS)	document storage that uses OneDrive for Business	<input type="checkbox"/>

A. See Explanation section for answer.

Answer(s): A

18. Your company is planning to migrate to Microsoft Azure and Microsoft 365.

You are required to identify a cloud service that allows for the deployment of a Linux virtual machine. Which of the following is the model you should choose?

A. Software as a Service (SaaS)

B. Platform as a Service (PaaS)

C. Infrastructure as a Service (IaaS)

D. Container as a Service (CaaS)

Answer(s): C

19. HOTSPOT (Drag and Drop is not supported)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
It is possible to connect cloud services to on-premises server resources.	<input type="radio"/>	<input type="radio"/>
Scaling cloud-hosted infrastructure components includes expanding server resources and networking components.	<input type="radio"/>	<input type="radio"/>

A. See Explanation section for answer.

Answer(s): A

20. DRAG DROP (Drag and Drop is not supported)

Your company has a Microsoft 365 subscription.

You have been tasked making sure that the IT department users can obtain Office 365 preview features prior to it being deployed to the rest of the company's users.

Which of the following are the two actions that would meet your goal? Answer by dragging the correct options from the list to the answer area.

Select and Place:

Options

Answer

Instruct all users to sign up for Office Insider.

Instruct IT users to sign up for Office Insider.

Set the update preference to Targeted release for selected users in the organizational profile.

Set the update preference to Targeted release for everyone in the organizational profile.

Set the update preference to Standard in the organizational profile.

A. See Explanation section for answer.

Answer(s): A
