1. Which of the following statements about Audio Paging Service are CORRECT? (Multiple Choice)

- A. A paging group supports only one channel broadcast at the same time.

- B. The audio paging service takes priority over all the other services.

- C. The paging access code can be used as the called number in a voice conference.

- D. Users who are engaged in ongoing calls listen to the broadcast in whispers.

Answer(s): A D

---

2. Which of the following statements are CORRECT about the voice conference function of U1960? (Multiple Choice)

- A. If a conference is not encrypted, phones can successfully join the conference regardless of whether the phones have SRTP enabled.

- B. If a conference is not encrypted, phones can successfully join the conference only when they have SRTP disabled.

- C. With SRTP enabled, IP phones can join conferences successfully regardless of whether the conferences are encrypted.

- D. With SRTP disabled, IP phones can join conferences successfully regardless of whether the conferences are encrypted.

Answer(s): A C

---

3. Which of the following methods cannot be used to back up and restore the U1900 version?

A. Putty+FTP server

B. Putty+TFTP server

C. eSight

D. LMT

Answer(s): C

---

4. Which of the following statements about IAD196 functions and features are CORRECT? (Multiple Choice)

A. One IAD196 supports 196 POTS users at most.

B. One IAD196 provides 1 main control board slot and 3 interface board slots.

C. It supports local switch.

D. When configured with ASI board, it is capable of power-off survival.

Answer(s): B C

---

5. Which of the following statements are CORRECT about the configuration file backup for U1900 series unified gateway? (Multiple Choice)

A. It is recommended that the configuration file be backed up once every week during off-peak hours (for example, 2:004:00 am).

B. The configuration file can be exported via web management page.

C. To ensure system stability, it is recommended that you back up the configuration file each time before the version upgrade.

☐   D. Auto backup is supported.

Answer(s): A C D

---

6. Which of the following statements is CORRECT about FXO and FXS ports?

A. FXO port on the PBX connects to the POTS phone.

B. An FXS port can connect to another FXS port.

C. An office has deployed an IAD to provide call services for 10 employees. In this scenario, the FXS port on the IAD can be used for PSTN outgoing calls.

D. The phone line of a POTS phone connects to an FXO port.

Answer(s): D

---

7. Which of the following methods can be used for differentiating between call rights of different users on U1900? (Multiple Choice)

☐   A. Call barring based on password or simple card number

☐   B. Rights customization

☐   C. Grouping by call source

☐   D. Password-based call barring

Answer(s): A B D

---

8. The HTTP server can deliver the same policy file to eSpace IP phones of the same model to upgrade the IP phones in batches.

A. TRUE

B. FALSE

Answer(s): A

---

9. The CDR transmission control switch is configured on the unified gateway.

A. TRUE

B. FALSE

Answer(s): A

---

10. Which of the following statements are CORRECT about the advanced secretary service of U1900 series unified gateways? (Multiple Choice)

☐ A. To configure two secretaries for one manager, at least two accounts need to be configured for the manager.

☐ B. The main line can be configured.

☐ C. A secretary can call a manager directly.

☐ D. A manager can have a private line.

Answer(s): B C D

---

11. The site after a U1900 is installed is a common site.

A. TRUE

B. FALSE

Answer(s): A

---

12. Before replacing a U1900 board, you need to wear grounded electrostatic discharge (ESD) wrist strap to prevent electric circuits from being damaged by ESD. Then, you can directly touch the electric circuits in the board when replacing the board.

A. TRUE

B. FALSE

Answer(s): B

---

13. The U1900 main control board provides the following functions() (Multiple Choice)

☐ A. Generating original CDRs

☐ B. Processing and converting protocols such as SIP and H.248

☐ C. Voice codec standards such as G.711 and G.723

☐ D. TDM switching

Answer(s): A B D

---

14. To centrally deploy and upgrade eSpace IP phones in DHCP Option 246 mode, deploy the DHCP server (mandatory) and HTTP server (optional).

A. TRUE

B. FALSE

Answer(s): B

---

15. Which of the following statements is CORRECT about the mode for querying the IP address of an IAD?

A. Dial *125 on the phone connected to the IAD. Then, the voice announcement plays the IP address.

B. Dial *128 on the phone connected to the IAD. Then, the voice announcement plays the IP address.

C. Log in to the IAD through the serial port and run the display ipaddress command to view the IP address of the device.

D. None of the above

Answer(s): C

---

16. The U1960 connects to both carrier A's network and carrier B's network. If all links to carrier A's network are occupied, which of the following approach is available for routing outgoing calls to carrier B's network? ( )

A. Default routing

B. Trunk bearer

C. Rerouting upon a routing failure

D. Call source analysis

Answer(s): C

---

17. Which of the following statements is CORRECT about user rights level on U1900?

A. Four user rights are available: Super, Advanced, Default, and Normal with the priority in descending order.

B. User rights Super, Advanced, Default, and Normal specify only the call rights (inter, ddd, local, and idd) for users.

C. Users with the Advanced right can call the prefix with the ddd call right at any time.

D. Users with the Super right can place international toll calls only at work time.

Answer(s): C

---

18. SIP user configuration shown in the following figure exists on the U1900 series unified gateway. Which of the following statements is CORRECT?

A. User 7000 can make intra-office and local calls.

B. User 7000 can make only intra-office calls.

C. User 7000 can make national toll calls in the specified time segment.

D. User 7000 can make international toll calls.

Answer(s): A

---

19. In U1900 serials unified gateway, which of the following approaches can be used for modifying called numbers for outgoing calls?

A. Number change

B. Long and short number

C. Number mapping

D. None of the above

Answer(s): A

---

20. eSpace U1900 series unified gateways provide a built-in voice system.

A. TRUE

B. FALSE

Answer(s): A
